

Performance Over Everything

Gerard Roofing Tiles look good, last longer and are safe and secure in any environment.

LOOKING GOOD

Gerard Roofing Tiles are pressed to traditional profile, and are designed to enhance the architectural style of any home or building. The superb colour range provides creative options in the choice of colour schemes.

SAFE AND SECURE IN ALL EXTREMES OF WEATHER

Gerard's interlocking profile and unique horizontal fastening system makes it especially suitable for areas prone to heavy snow fall, heavy rain, high winds and even hurricanes and typhoons.

EARTHQUAKE RESISTANCE

There are countless records of Gerard roofs standing firm in violent earthquakes while neighbouring buildings have collapsed due to the heavyweight nature of their roofing materials.

MANUFACTURED TO INTERNATIONAL STANDARDS

AHI Roofing Limited is registered to ISO 9001 which recognises the quality management systems standards now accepted in more than 150 countries around the world. This certification recognises the commitment of AHI Roofing to quality, productivity, cost competitiveness and customer satisfaction.

GERARD ROOFING TILES ADD TO THE STYLE AND SECURITY OF ANY HOME OR COMMERCIAL BUILDING

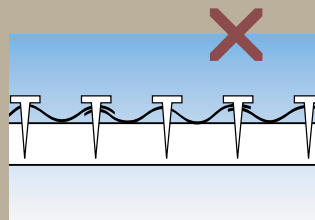

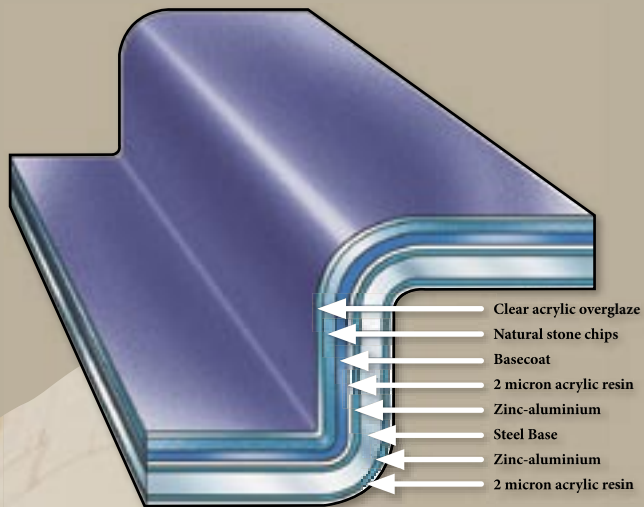

EACH TILE IS PRESSED FROM HIGH GRADE ZINCALUME STEEL GIVING GREAT STRENGTH

THE TRADITIONAL PROFILE IS ENHANCED WITH THE BEAUTY OF A NATURAL STONE CHIP COATING

AHI ROOFING PANEL

Top nailing, the way many competing products are fixed, can result in rust around the nail holes. Panels are also open to wind uplift.

Gerard's unique horizontal fixing allows no leakage and leaves no loose edges for wind to work on.

TECHNICAL SPECIFICATIONS

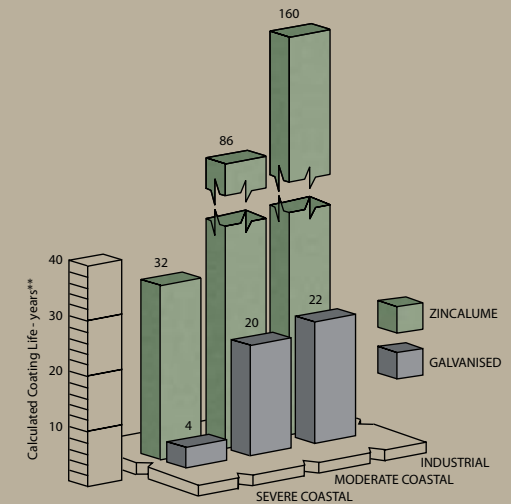

Base steel	0.39mm
Zinc-aluminium	150g/m ²
Total substrate thickness	0.43mm
Tile coverage	2.15 tiles/m ²
Tile weight per square metre	7kg/m ²

CHOOSE THE CORROSION RESISTANCE OF ZINCALUME® COATED STEEL

ZINCALUME® coated steel has superior long term corrosion resistance. The combination of the sacrificial protection of zinc with the barrier protection of aluminium provides superior performance to galvanised coatings in almost all environments. This all adds up to a significantly longer service life.

Zincalume® is a registered trademark of BlueScope Steel Limited.

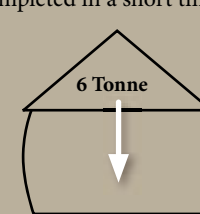

ESTIMATED LIFE OF GALVANISED AND ZINCALUME® STEEL

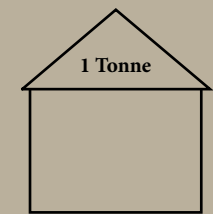

Figures quoted by BHP in BIEC Clips 48, 8/97 for uncoated Zincalume®

LIGHTWEIGHT ADVANTAGES

At only 7kg/m² Gerard Roofing Tiles make up one of the lightest roofs available. Less weight on the roof means less stress on the sub-structure. In many cases substantial savings can be made as there is no need for expensive reinforcing of the sub-structure. Being light in weight, Gerard Roofing Tiles are easily handled, and installation is completed in a short time.

Concrete Tiles

Gerard Roofing Systems

Concrete roof tiles weigh more than 6 times an equivalent Gerard roof area. This means substantial savings can be achieved in sub-structural costs. Having less weight over your head is also a very important consideration in earthquake prone areas.
